Ripple Maker II Pro

Creating Designs in
Multi &Two Color

Ocean Blend Pod Kit

Ocean Blend comes with two Pods, the Chameleon Pod & Plus Pod.

The Chameleon Pod can be used alone or together with the Plus Pod.

The Chameleon Pod is made from red cabbage juice a natural pH indicator, resulting in different shades on different drinks according to their acidity.

The Plus Pod works **exclusively** with the Chameleon Pod to adjust the cabbage juice's pH resulting in Red-Blue spectrum of colors!

Note: When installing the Chameleon Plus Pod Kit install the Plus Pod in the left Pod holder and the Chameleon in the right Pod holder.

See this photo ->

Also Note: The Plus Pod solution is transparent so if you print with only the Plus you will not see the print. If this happens you can change the default Pod in the Ripple Maker settings to the Chameleon Pod for printing regular one color designs.

Jungle Blend Pod Kit

Jungle Blend comes with two Pods, the Chameleon Pod & Sun Pod.

The Chameleon Pod can be used alone or together with the Sun Pod.

The Chameleon Pod is made from red cabbage juice, a natural pH indicator, resulting in different shades on different drinks according to their acidity.

The Sun Pod works **exclusively** with the Chameleon Pod to adjust the cabbage juice's pH resulting in Green-Yellow-Magenta spectrum of colors!

Note: When installing the Jungle Blend Pod Kit install the Sun Pod in the left Pod holder and the Chameleon in the right Pod holder.

Also Note: The Sun Pod solution is very yellow and looks best with a darker color outline.

MULTI-COLOR DESIGNS

Multi Color Design

Printed only with Chameleon Pod

Printed with Ocean Blend Kit - Chameleon & Plus Pods

Chameleon Pod used alone prints burgundy on a dark beer.

The Plus Pod multi-color design tells the Ripple Maker II Pro to print different quantities of the Plus Pod on top of the Chameleon Pod to achieve the gradient effect.

MULTI-COLOR DESIGNS

Multi Color Design

Printed with only Chameleon Pod

Printed with Ocean Blend Chameleon & Plus Pod

Chameleon Pod alone prints purple on milk.

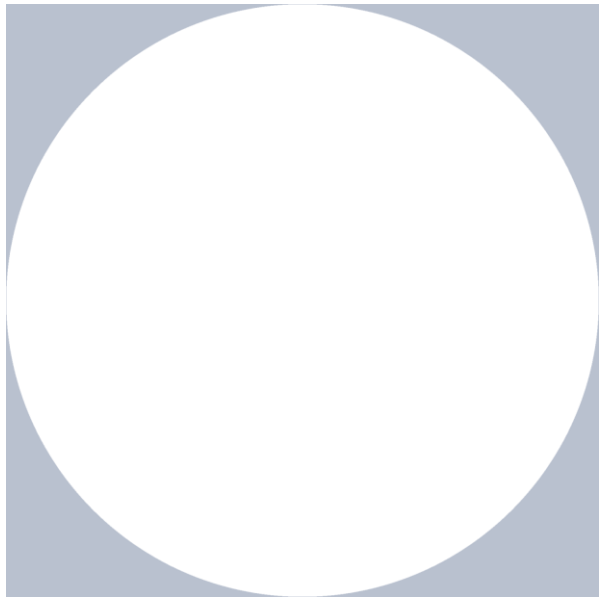
Creating Multi Color Designs

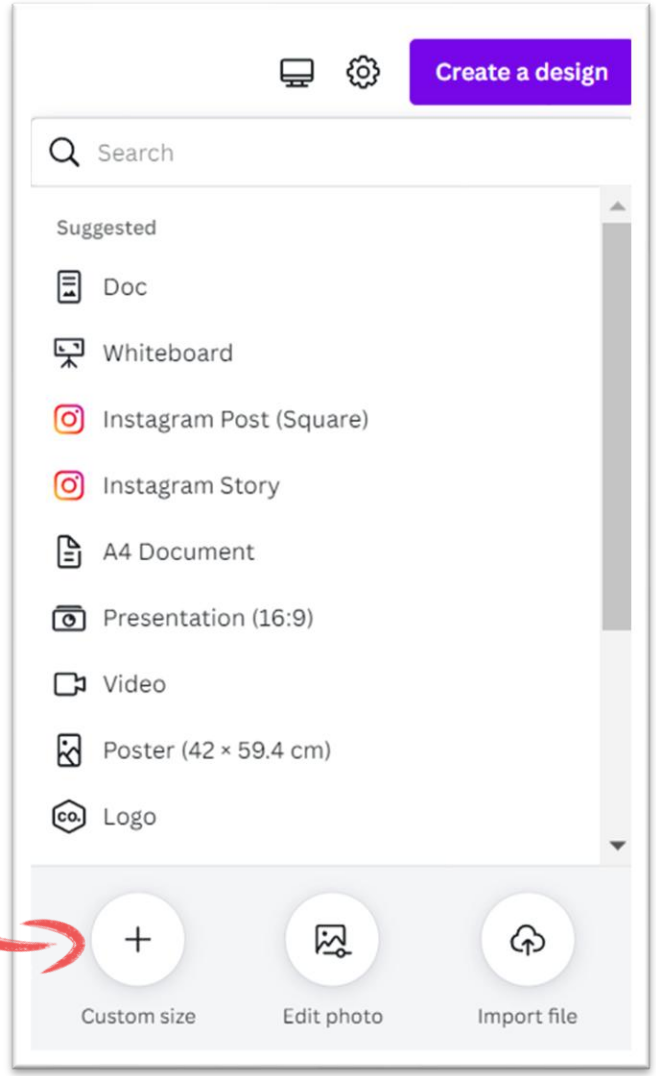
Create new multi color designs quickly using www.canva.com

Step 1- click create a design and click “Custom size”

Type- 1700x1700 pixels

Step 2- apply design template as a background to keep your creation centered. Download the template here.



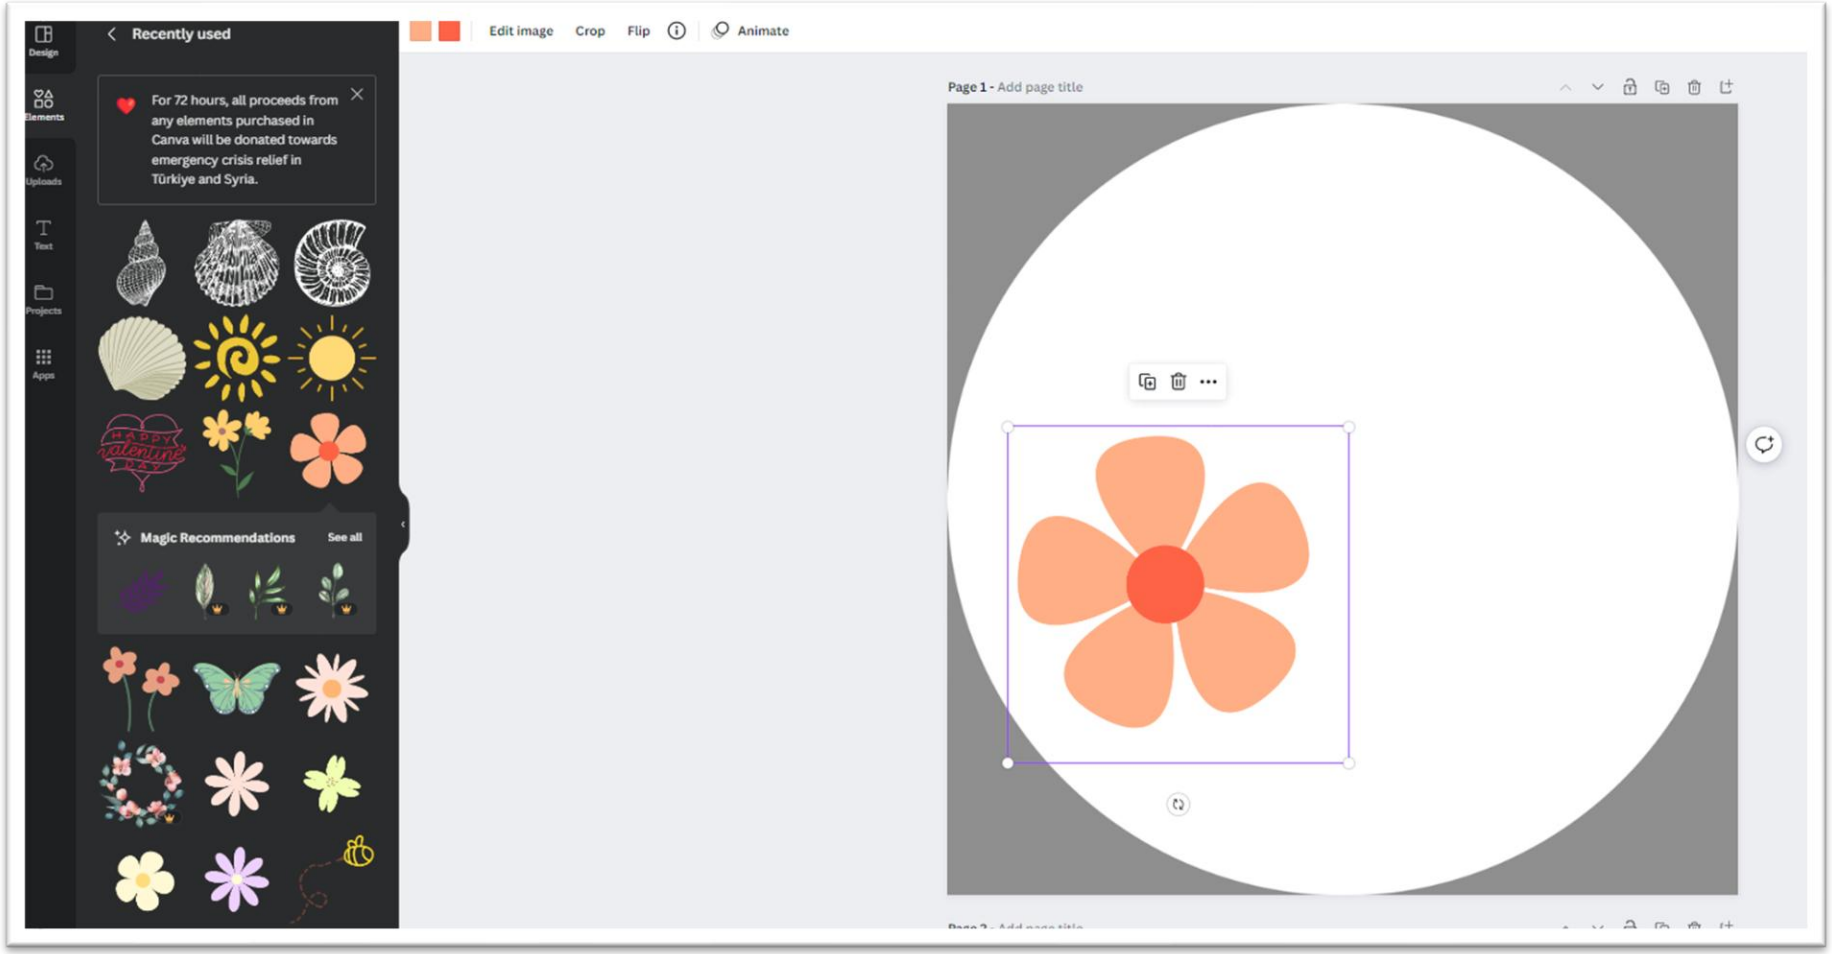


CREATING MULTI-COLOR DESIGNS

You can upload your own graphics and edit their colors if they are .SVG file type.

Choose graphics from Canva that have 2 or more editable colors.

Find thousands of free editable graphics in the Elements tab



CREATING MULTI-COLOR DESIGNS

Use this palette to select colors for your multi-color designs. Download the palette here.

Chameleon

If you want this color on your drink, sample the color above, e6ffff

The top half of each color box shows the color you need to select in order to produce the printed color shown in the bottom half when using the Chameleon Plus Kit. Use the Eyedropper tool to sample the top half of the box if the bottom half is the color you want to achieve.

CREATING OCEAN BLEND DESIGNS

Choose your correct palette. Depending on what drink you are serving selecting the right palette will help you achieve the best color results possible.
