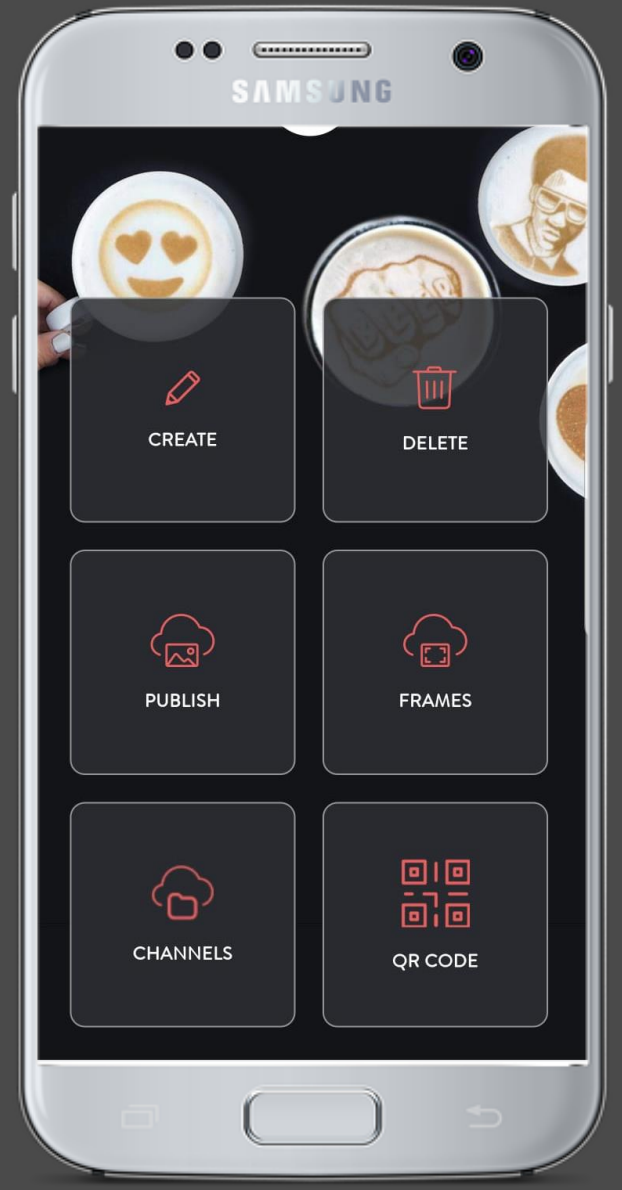
IN APP FLOWS

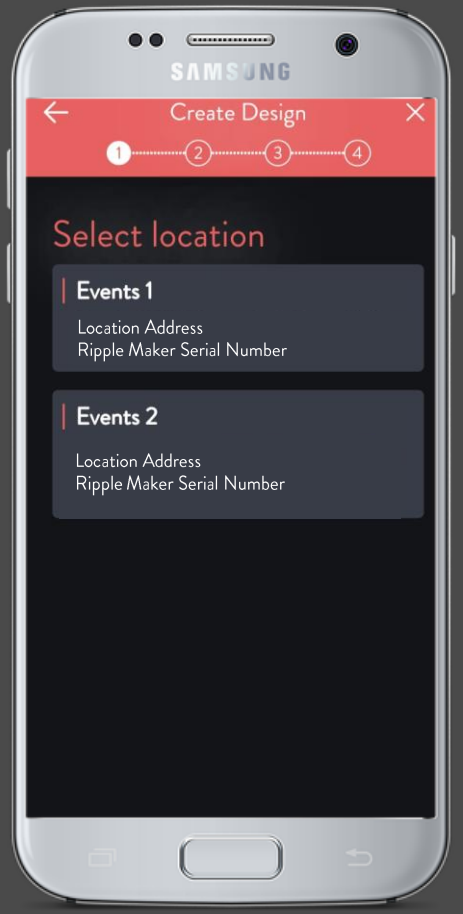
In the main menu you will have 6 different actions you can complete

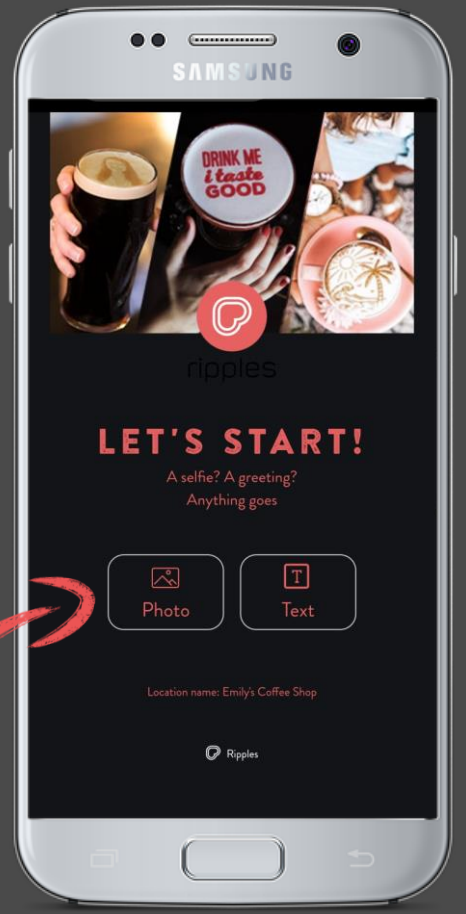
1. Create
2. Delete
3. Publish
4. Frames
5. Channels
6. QR Code



CREATE

This feature allows you to upload custom text, images or designs.

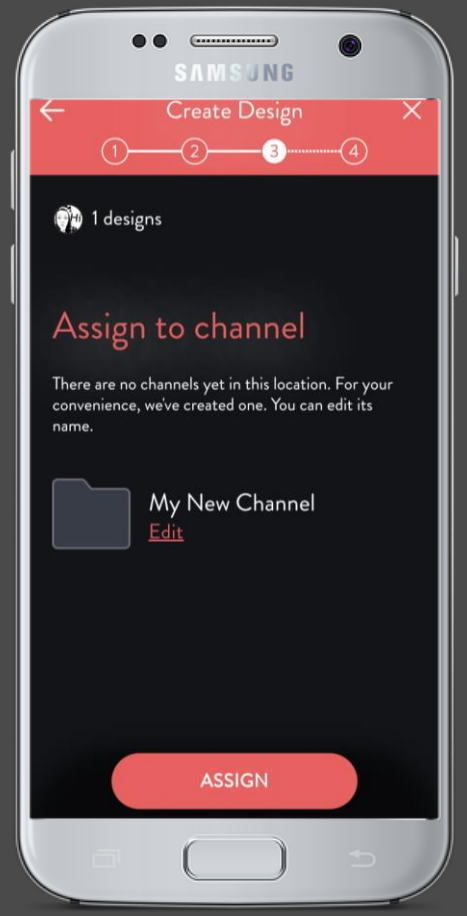




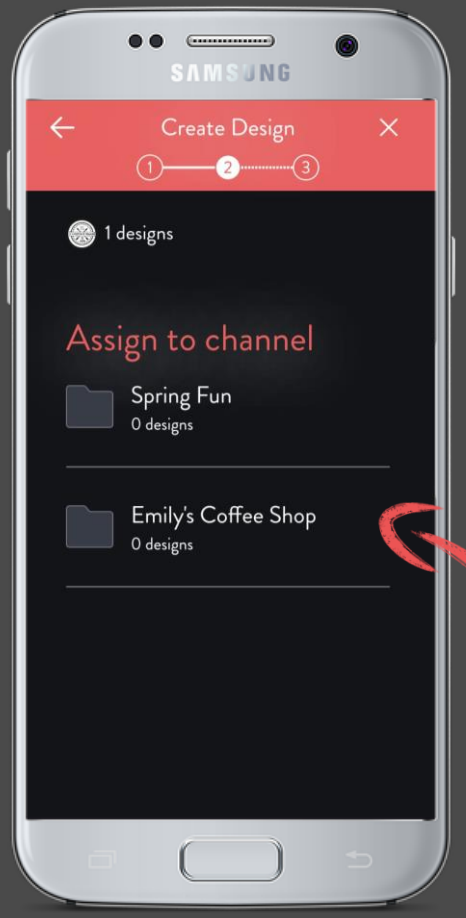
1. If you have more than one location choose which location to edit.
2. Photo- to take a photo, or choose from your gallery.
   Text- create a custom text design.
3. Pinch to zoom and adjust the image.
4. Select a filter that increases the image contrast.

CREATE

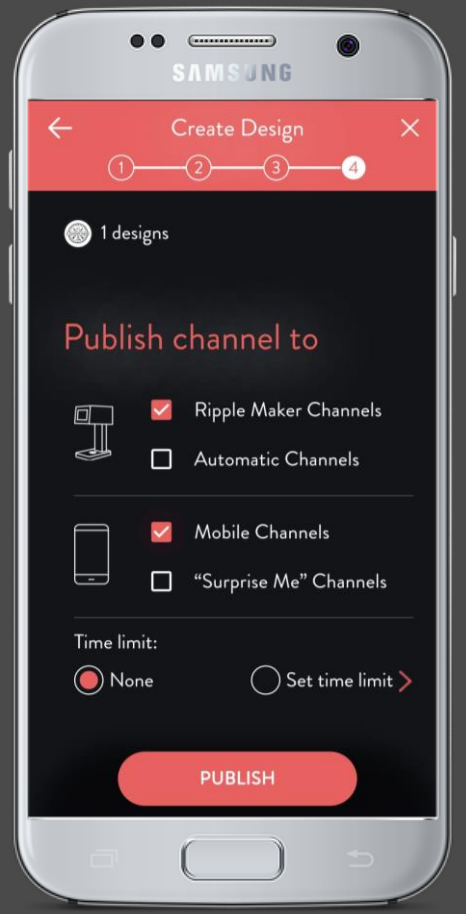
This feature allows you to upload custom text, images or designs.



The first time uploading a design to your Ripple Maker you will be asked to make a new Custom Channel. Tap "ASSIGN"



If you already have channels at this location select which channel you want to publish the design too.



Choose to publish the channel on Ripple Maker or Mobile App, select a time limit & "PUBLISH"

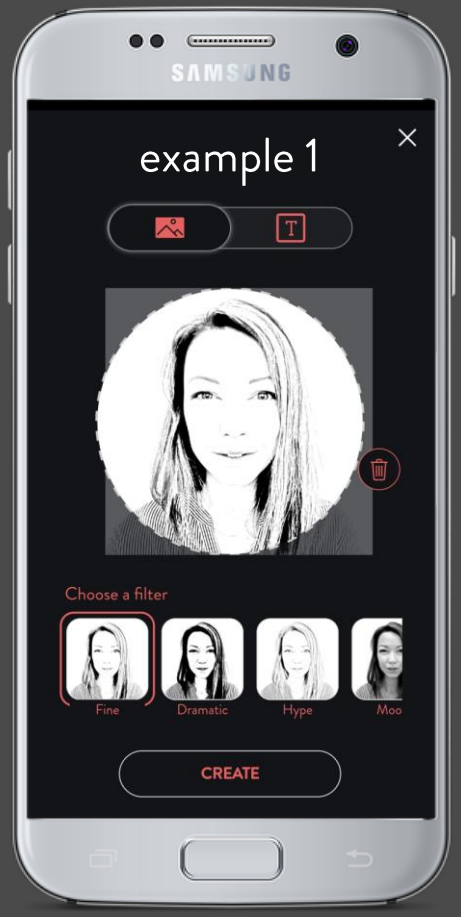
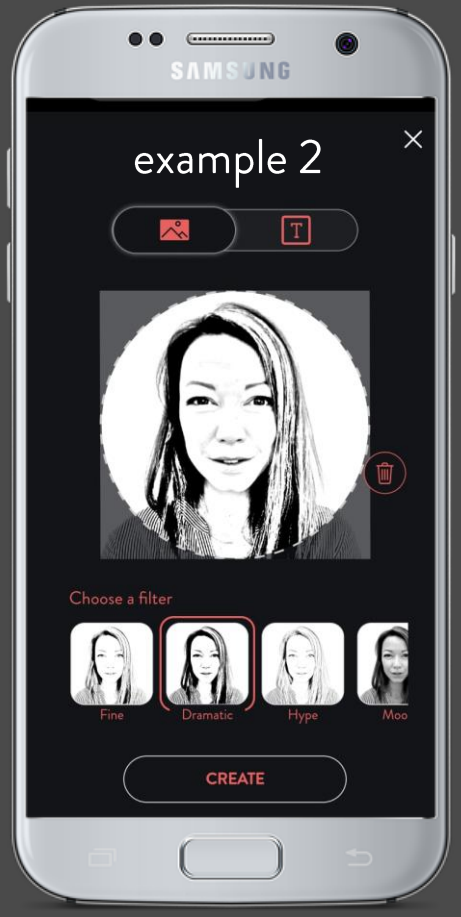
CREATE

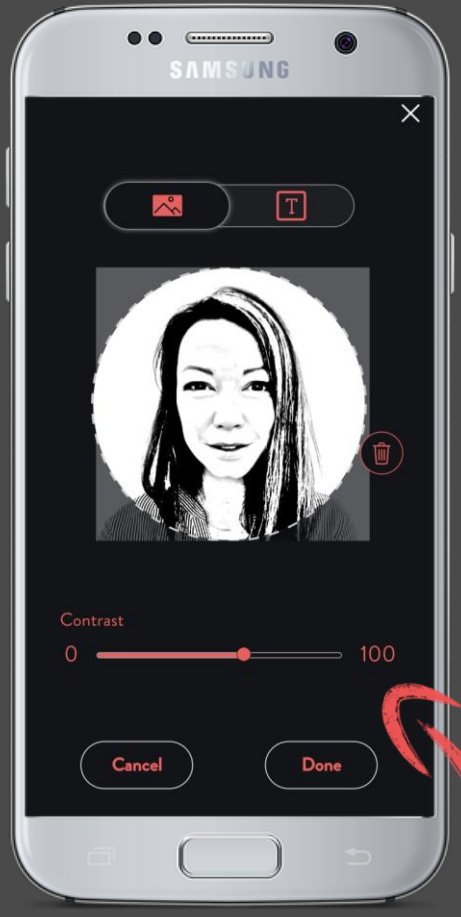
Tips for choosing filters & creating the best designs.

This filter is not good for this photo. It is too light, washed out, and has no definition.





This filter is great, eyes and hair are defined, background is bright and white. A white background free of distractions/objects always looks better than a dark background when printed.



1. Select a photograph from your phone's library, or take a new one with the camera.
2. Choose a filter that enhances the contrast of the image, some filters will help brighten the image like "fine", see example 1, others will help intensify the contrast, like the "Dramatic" filter, see example 2. Tap the filter after selecting it to adjust the intensity.
3. Tap "CREATE" and follow the steps on slide 5 & 6.
